

FOR IMMEDIATE RELEASE

CONTEMPORARY ARTIST, EDWARD LONGO, HAS JUST COMPLETED THE NOVEL THAT HAS GOTTEN HIM REELING IN EXCITEMENT. WHY ALL THE EXCITEMENT? IT'S IN THE SCIENCE, THE POETRY, THE SPIRIT – WHISPERS FROM THE UNIVERSE.

During the creation of his twelve vibrant paintings abstract expressionist Edward Longo began referring to his inspirational images as, Divine Interventions of The Gods. In producing one painting a day for 12 consecutive days, Longo not only began feeling empowered, he became so highly motivated he continued to focus on the images until bringing his artistic prose and penchant for writing to a new level. It was actually this series of paintings that influenced him to go a step further to create his novel, consisting of *A 'Reader's Digest' Gathering of Scientific Terms and Astronomical Explanations Regarding the Evolutions and the Origins of Our Universe.*

As the idea began to formulate in his head, the artist, thinking now as author, began to see how he could feasibly develop an entire chapter for each of the twelve paintings. As the text began to unfold Longo decided to incorporate his knack of poetry in combination with the scientific language as the knowledge unfolded. The word “unfolded” is used here because the author does not claim to be a scientist, rather he has skillfully learned to apply his knack of research gathering and composite fact-finding, in tandem with artistic presentation.

In spite of the explanations provided by scientists, environmentalists, physicists and engineers regarding global warming, and the astrophysical developments affecting our universe it is difficult to make sense of it all. In this poetic, prose-like, informative "Reader's-Digest" manner Longo offers an artistic and colorful presentation while attempting to provide a logical understanding of the origin, the evolution and the way things work in the universe. This is especially true regarding WHISPERS of The Big Bang, and other events affecting the planetary system within our mother galaxy, The Milky Way.

Complete with artistic paintings and poetic text, WHISPERS FROM OUR UNIVERSE is sure to arouse much interest as to what is taking place around us, beyond that innocent blueness of our skies. Of particular importance is that one of the experiments on various Cluster spacecrafts is that it is used to study plasma called WHISPER. This is the French-led instrument that measures electron density as the spinning spacecraft sweeps around the planet.

What does this mean to the reader? It means that they will be able acquire vast information regarding the goings-on, not only here on earth, but within the workings of our expanding universe. For a glimpse of what is to come the author has written a BLOG appropriately titled, “What’s Inside This Titillating Novel.”
